```

+

my name is .. ravi kishan ,,,,.

```
<!DOCTYPE html>
<html lang = "en"></html>

<head>

<meta charset="UTF-8">
<title>Inline</title>

</head>

<body>
    <p style ="color: rgb(216, 170, 51);">Style me in yellow!</p>
</body>

</html>
```

Style me in yellow!

```
<!DOCTYPE html>
<html lang = "en"

<head>

<meta charset="UT
<title>Internal</title>
<style>   h1{ color: rgb(73, 202, 26);}   </style>

<body>
    <h1>style Me in Blue !</h1>
</body>
</head>
```

document's title is often different from its first heading, since the first heading
taken out of context.

Widely available across major browsers (Baseline since 2015)

MDN Reference

style Me in Blue !

```
1   h1  { font-size: 200%; color: rgb(232, 226, 231); background-color: rgb(5, 43, 62);font-synthesis: styl
